PROFESSIONAL SUMMARY

Recently graduated Software Engineer from Kazan Federal University with a strong passion for building modern web applications. Experienced in developing responsive and scalable applications using React, Next.js, NestJS, TypeScript, PostgreSQL and Prisma through academic and personal projects.

Skilled in both frontend and backend development with particular strength in React and Next.js. Enjoy solving complex problems, improving user experience, and building clean, maintainable software. Seeking a Junior Frontend, Full Stack, or Software Engineer position where I can contribute while continuing to grow professionally.

TECHNICAL SKILLS

Languages

JavaScript • TypeScript • Python • Java • SQL

Frontend

React • Next.js • HTML5 • CSS3 • Material UI

Backend

Node.js • Express.js • NestJS • REST APIs

Database

PostgreSQL

ORM

Prisma

Tools

Git • GitHub • VS Code • Figma

COLLABORATION EXPERIENCE

Latin America Day — Kazan Federal University

Worked as a Frontend Developer in a collaborative team responsible for building the official event registration platform for one of the university's international cultural events.

Gained experience working with Git, team collaboration, task coordination, and React development.

Technical Customer Support – ITContact - 1 year

I had the opportunity to be part of the team of the Russian company “ITContact” , where I was working with a huge database, solving problems with the users’ accounts such as personal data update, payments problems, doubts about the company and block accounts.

PROJECTS

BioAlert | Full Stack Developer

Technologies: Next.js, NestJS, PostgreSQL, Prisma, YOLOv8 AI

Developed a complete web platform for reporting animal abuse cases.

Designed and implemented both frontend and backend architecture.

Integrated an AI-based spam detection system using YOLOv8 to reduce false reports before operator review.

Implemented authentication, complaint management, database integration, and responsive user interfaces.

GitHub:

<https://github.com/EIJulii/BioAlert-main>

The World War II | Frontend Developer

Technologies: Next.js

Designed and developed an educational platform presenting World War II from the perspectives of multiple countries including the United States, Soviet Union, United Kingdom, France, Germany, Italy and Japan.

Focused on responsive UI, reusable components, optimized routing, structured content organization, and modern web design.

GitHub:
