

Software Engineer

Julian Mateo Lara Ramon — Frontend / Backend / Full Stack Developer

Quito, Ecuador | +7 965 596 70 07 | juli2003juli@gmail.com | linkedin.com/in/julian-lara-5920193a7 | github.com/EIJulii | <https://portfolio-lara-julian.vercel.app/>

PROFESSIONAL SUMMARY

Software Engineer graduated from Kazan Federal University, focused on building responsive, scalable web applications with React, Next.js, TypeScript, NestJS, PostgreSQL and Java with Spring Boot. Comfortable owning both frontend and backend layers, from UI implementation to API design and database architecture, across independent and team-based projects. Looking to join a software engineering team as a Frontend, Backend or Full Stack Developer to build reliable, user-focused products.

TECHNICAL SKILLS

Languages	JavaScript, TypeScript, Python, Java, SQL
Frontend	React, Next.js, HTML5, CSS3, Material UI, Responsive Web Design
Backend	Node.js, Express.js, NestJS, Spring Boot, REST APIs
Databases & ORM	PostgreSQL, Prisma
Tools & Practices	Git, GitHub, Figma, Cross-functional Collaboration, Software Development Life Cycle (SDLC)

PROFESSIONAL EXPERIENCE

Frontend Developer — Collaboration

Kazan, Russia

Latin America Day, Kazan Federal University

- Delivered the official online registration platform for one of the university's largest international cultural events by building responsive React components and integrating them with the backend team's API.
- Kept a multi-developer codebase stable and easy to merge by following Git branching workflows and taking part in collaborative code reviews throughout the project.

Customer Support Specialist

Kazan, Russia — 1 year

ITContact

- Resolved account, billing and access issues for customers in a high-volume support queue by researching and updating records directly in the company's large-scale customer database.
- Kept customer profiles accurate and current by handling data updates, payment troubleshooting and account lock/unlock requests as part of daily support operations.

FEATURED PROJECTS

BioAlert — Full Stack Developer

[Next.js](#), [NestJS](#), [PostgreSQL](#), [Prisma](#), [YOLOv8 AI](#) | github.com/EIJulii/BioAlert-main

- Built a full-stack platform for reporting animal-abuse cases end to end — UI, API and database — using Next.js on the frontend and NestJS with PostgreSQL/Prisma on the backend.
- Reduced the number of false or low-quality reports reaching human moderators by integrating a YOLOv8 image-recognition model that flags likely invalid submissions before review.

The World War II — Frontend Developer

[Next.js](#) | github.com/EIJulii/WW2_legacy | ww-2-legacy.vercel.app

- Designed and built an educational platform covering World War II from the perspective of seven countries, structuring reusable components and clear navigation to keep a large content archive easy to browse on any device.

Latin Day — Frontend Developer

React | github.com/DataJoshua/latinoamerica-ru | latinos-kfu.netlify.app

- Contributed responsive frontend features to a university-wide event registration platform as part of a multi-developer team, supporting Kazan Federal University's Latin America Day.

Apartments Marketplace — Frontend Developer

React | github.com/ElJulii/Apartments_Laras

- Built a real-estate listing site for the Quito, Ecuador market, giving buyers image galleries, property detail pages and direct contact forms to reach sellers.

500/700 Company Website — Frontend Developer

React | github.com/ElJulii/fivetoseven_interview

- Delivered a commercial marketing site for an artistic-modeling agency by building reusable React components and an intuitive navigation structure across multiple product categories.
